

## **Regulation § 32150. Subpoenas.**

### **(f) Production Schedule for Records Subpoenas**

(1) The requesting party shall specify in the records subpoena the date, time, and location for production of requested items. The requested production date may be a hearing date. If the responding witness, entity, or party has at least twenty (20) days to respond following service of the records subpoena, then the requested production date may be a non-hearing date. The requested production date may not be later than the last scheduled day of hearing, unless otherwise ordered by the Board agent.

(2) The responding person or entity shall produce the requested items as specified in the records subpoena unless agreed otherwise or the Board orders otherwise. The responding person or entity need not produce items covered by a motion to revoke or limit a subpoena filed pursuant to subsection ~~(h)~~ **(i)**, pending resolution of the motion.

(3) If a records subpoena specifies a requested production date that is not a hearing date, and requires both records production and witness testimony, then the subpoena shall be deemed to require such testimony at the next scheduled hearing date, unless agreed otherwise or the Board orders otherwise.
